DETAILED ACTION

Applicant's arguments, see paper, filed 12/4/08, with respect to the rejection(s) of claim(s) under 35 USC 112, 102 and 103 have been fully considered and are persuasive. Therefore, the rejection has been withdrawn. However, upon further consideration, a new ground(s) of rejection is made below.

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 24,25,28-34 are rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims of U.S. Patent No. 7161016. Although the conflicting claims are not identical, they are not patentably distinct from each other because USPN '016 makes claims to medicinal composition comprising compounds used in the instant method claims. USPN '016 and instant application teach that the magnitude of action and relatively short duration of action of anandamide

compounds is due a fast inactivation process consisting of carrier-mediated transport into cells followed by intra-cellular hydrolysis by anandamide amidase (see column 1 lines 33-46 of USPN '016 and page 2, 2nd full paragraph of instant application).

Although the claims in USPN '016 and instant application differ statutorily, the utility of the compounds employed in the USPN '016 medicinal composition and in the instant method claims is the same. For this reason, USPN '016 makes obvious the instant claims.

Claim Objection

Claim 27 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims. USPN '016 does not teach or suggest the invention comprising the compound disclosed in claim 27.
